

Self-Isolation Work for Year 10 and 11 Design and Technology students

All KS4 students during self-isolation are expected to continue with their current project work.

In particular, Year 11 will be currently working on their GCSE NEA task and are advised to use the guidance project booklet that outlines the expectation of each individual page of their project. Through work supported by their teacher in the class, all students should know where they currently are in the project and complete all outstanding pages.

Year 10 are working on a variety of skill-based projects and can use the project brief sheets that have been handed out in lessons to guide their work during isolation.

The use of www.technologystudent.com is also advised to all KS4 students when isolating, this is an excellent website with a wealth of technology tasks and information for students.
