Down below is a Skeleton. Can you label all of the bones?

There is a box with the names of the bones to

What are the six different functions of the Skeleton? Why do we need the Skelton to do this?

There are 2 types of joints can you name them? Can you give me some examples and tell me what sort of movement they allow?

The Skelton protects major organs in your body. Can you name the organs the skeleton protects?

Clavicle	Scapula	Femur
Humerous	Patella	Pelvis
Carpals	Tarsals	Metatarsals
Vertebrae	Ulna	Radius
Mandible	Phalanges	Tibia
Fibula	Metacarpals	Cranium
Ribs	Sternum	Mandible
